THE NONPROFIT ALLIANCE
LEADERSHIP HUB PROGRAM

AUSTRALIA'S LEADING PEER-2-PEER MENTORING NETWORK

Building leadership capability in the not-for-profit sector

Exclusively for CEOs and Senior Executives, the NPA Leadership Hub program is a vibrant, supportive peer-to-peer shared learning and mentoring network focussed on developing the skills and expertise of senior leadership team members of Australia's social sector organisations.

NPA members are leaders from a range of organisations including non-profits, associations, social enterprises, and for purpose organisations. This is not a stand-alone course, but a sustained and long-term peer to peer leadership program, that will support you each day with your leadership challenges and opportunities.

WE CAN HELP YOU THRIVE NOT JUST SURVIVE

Recognising the increased challenges and complexities you face as a leader, we know it's often lonely at the top – the NonProfit Alliance provides you with the support to thrive, not just survive.

IT'S TIME TO INVEST IN YOU

With few opportunities for non-profit leaders to step back from their day to day operational responsibilities, research shows that investing in leadership development has systematic positive effects and can increase organisational capacity and impact.

WHY SHOULD I JOIN?

As a long-term peer-to-peer leadership program, The NonProfit Alliance lets you collaborate, learn and share your issues and opportunities, helping you to achieve organisational and personal success

The program allows for real-time thinking – working on genuine issues and opportunities, harnessing extensive peer experience that allows for invaluable insights and creates change.

And we hold you accountable. You set goals, you revisit issues and understand how solutions were implemented, what worked and what didn't.

“Training and professional development activities enhance the competence of NFP staff and volunteers so they can better realise their potential. This in turn improves individual and organisational effectiveness and efficiency, which have positive downstream effects on social impact”
